

V2 BEAUTY BOOSTER INFUSION MICRONEEDLING

Teosyal Redensity 1 is a unique patented formula, comprised of hyaluronic acid plus a combination of antioxidants, amino acids, minerals and vitamins. All of which are naturally present in our skin. The Beauty Booster Device injects TEOSYAL REDENSITY 1 into the superficial layers of the skin with precise accuracy and depth. Treatment areas includes the face, neck decolletage and backs of hands. Teosyal Redensity 1 treatments have shown improvement in skin glow, elasticity, texture, fine lines, hydration and re-densification of the skin. For optimal results, it is recommended to have 3 sessions at 3 week intervals for immediate and cumulative results. To maintain these results, most patients only require a single session 3 to 4 times a year.

TREATMENT EXPECTATIONS: You will feel a mild vacuum, followed by a slight stinging sensation. The treatment itself is very tolerable, but some patients may be more sensitive. Immediately after your treatment, you will see the product that has been placed under the skin. This looks like small bumps all over the treated area. These small deposits (bumps) may last for up to 24-48 hours. Red/pink tone to the skin followed by a sunburn like sensation and mild tingling is normal and too be expected after the session, and resolves soon after.

CONTRAINDICATIONS

Please advise your medical provider if you have any of the following:

- Severe Allergies with a history of anaphylaxis -Multiple severe allergies
- Allergies to Hyaluronic acid, fillers
- Allergies to Lidocaine or other local anesthetics.
- History of autoimmune disease, recurrent sore throats, rheumatic fever, epilepsy or porphyria.

PRE-CARE INSTRUCTIONS

- Please advise your medical provider with history of allergies, medications and **any** changes in medical history
- Aspirin (ASA), NSAIDS such as Ibuprofen, Advil, Motrin, Aleve and some arthritis medications.
All healthy antioxidants will make you prone to bruising including Luma-Glow Oil.
IMPORTANT: Do not stop taking any medication that has been prescribed or recommended by your doctor.

POST-CARE INSTRUCTIONS

It can often take up to two weeks or more to see the improvement in your skins health. Results are cumulative. Some changes may be noticed after your first session, but optimal results are generally seen 3-4 weeks after your third session.

- Do not apply makeup for 2-3 hours after session
- If swelling occurs take an antihistamine such as Reactine, Clariton, (non sedating)
- Drink plenty of water before and after your session to ensure you stay well hydrated

- If swelling occurs take an antihistamine such as Reactine, Clariton, (non sedating)
- Drink plenty of water before and after your session to ensure you stay well hydrated.
- If bruising occurs, you can Apply Arnica Gel directly to the bruise to reduce the severity and time the bruising is noticeable.
- Wear SPF 30 or higher to maintain and prolong your results

PRODUCT PAIRING SUGGESTIONS TO MAXIMIZE YOUR RESULTS:

To continue reidentifications + antioxidant support:

- Vivier grenzine serum
 - Grenzine Neck
 - Grenzine Eye
 - Vivier Ultimege dual action complex with neuropeptides + hyaluronic acid
-
- Ask to book a complimentary consultation to review and update your current skincare regime and ensure your results are maintained. As always sunscreen should be applied throughout the day. This can easily be done by using Sunforgettable Brush-on Sunscreen.

IMPORTANT INFORMATION: You may experience temporary redness, swelling, itching, or bruising. If this occurs, apply an ice pack or a cold compress.
For any other concerns or questions, do not hesitate to contact the clinic.
