SHAPE IT

JUVÉDERM[®] IT

**YOUR GUIDE TO REFRESHING
YOUR LOOK WITH FACIAL FILLERS**

 **Juvéderm[®]**

REFRESH IT

You work hard and want to look sharp at the office, but sometimes your face can show signs of tiredness that you want to control.

An increasing number of men are becoming concerned about their appearance and turning to non-surgical treatments, including facial fillers, to help manage their look.

When you JUVÉDERM® IT, you can refresh specific facial features to aim for the look you want. As the world's leading brand of hyaluronic acid facial fillers,* JUVÉDERM® can help (depending on the treatment chosen):

- Smooth **lines** and **wrinkles**
- Provide lift by **restoring volume**
- Contour the **chin** and **jawline**
- Maintain a **natural look** and a **natural feel**†

**RESULTS CAN LAST
FOR UP TO 24 MONTHS,
DEPENDING ON THE
TREATMENT CHOSEN.**

* Based on healthcare professional tracking market research, from over 1000 healthcare professionals in the largest 13 aesthetic markets worldwide.

† The study describing natural looking and natural feeling results evaluated the effects of Juvéderm® VOLBELLA® over a period of 12 months.

ACHIEVE IT

When you look and feel your best, it's easier to perform at your best. Whilst there are many things you can do to improve your appearance and skin quality (exercise, a good skin-care routine, a healthy diet), some things are harder to control:

- The effects of frequent shaving on your skin
- Environmental effects such as pollution, sun exposure and stress
- Natural face shape that changes as you age
- A tired look around your eyes

Whether you feel your natural features aren't as defined as you'd like or you've just started to notice a few lines and wrinkles around your eyes — you can take action.

IDEAL LOOK

A growing number of men are pursuing treatments like facial fillers to address their concerns on appearance.

JUVÉDERM[®] IT

JUVÉDERM[®] facial fillers are injectable treatments that can shape and contour specific facial features — with results that can last for up to 24 months, depending on the treatment chosen.

JUVÉDERM[®] can add volume to specific areas of the face — lifting cheeks, smoothing lines and shaping the chin and jawline.

Many **JUVÉDERM[®]** facial fillers include lidocaine which can help reduce discomfort during the procedure. The range is designed to treat different areas of the face, and visible results can be seen shortly after treatment.

JUVÉDERM[®] facial fillers may cause side effects, so it is important to discuss this with your healthcare practitioner to help you decide if JUVÉDERM[®] is right for you.

A NATURAL LOOK AND FEEL

To help keep you looking like you, whether you're smiling, laughing or frowning, our patented technology allows JUVÉDERM[®] to integrate into the tissue under the skin.

During consultation, your healthcare practitioner will check your face whilst it's still (static) and moving (dynamic) with the aim of giving you a natural-looking result, whatever emotion you're feeling.

REFRESH IT

DEPENDING ON THE TREATMENT CHOSEN,
OUR FACIAL FILLERS ARE DESIGNED TO HELP:

A

Smooth lines and wrinkles around your eyes*

B

Add fullness back to your midface
for a more defined look

C

Contour your chin and jawline

* Reserved for specialists specifically trained in this technique who have a sound knowledge of the physiology of this particular area.

Image is for illustrative purposes only.

HYDRATE IT

Feel comfortable in your own skin, feel your best. But what does “good skin” really look and feel like? According to research with healthcare professionals, it is based on 3 main factors:†

TEXTURE

Skin that is hydrated and lacking in fine lines.

ELASTICITY

Skin that is firm.

COLOUR

Skin that is not pigmented or red.

Juvéderm® VOLITE™:

JUVÉDERM®'s Skin-Quality Injectable can help improve skin hydration for up to 9 months.*

It can be used for face and neck to:

- Improve the appearance of fine lines
- Hydrate skin
- Improve skin smoothness‡

“ I SAW SOME PEOPLE I HADN'T SEEN IN A WHILE AND THEY COMMENTED ON HOW FRESH-FACED I WAS LOOKING. ”

JUVÉDERM® CUSTOMER, 33

* Studies evaluating Juvéderm® VOLITE™ used Juvéderm® VOLITE™ B (without lidocaine).

† In 2015, a total of 40 healthcare professionals from Canada, UK, France, Italy and Taiwan took part in research designed to evaluate skin quality.

‡ Changes in the texture of cheek skin was used to evaluate skin smoothness.

PERSONALIZE IT

While there may be a specific facial area you're looking to enhance, your healthcare practitioner may evaluate multiple areas to help you aim for the look you want.

WHICH IS IT?

JUVÉDERM® has a range designed to treat different areas of the face. Your healthcare practitioner will work with you to identify suitable JUVÉDERM® treatments for you.

GET IT RIGHT

Your goals, your plan. Your healthcare practitioner can help create a personal treatment plan, based on your individual goals, and advise you on the JUVÉDERM® treatments that can help you achieve the results you're aiming for.

QUICK

Results are visible straight
after treatment.*

ASK IT

You frequently ask it. We answer it. Talk to your healthcare practitioner for more guidance and advice on aftercare, as well as further information on the questions below.

Q. How soon can I return to my normal routine?

- A. You may experience redness or swelling after treatment. However, many people can return to their normal routine on the day they are treated, depending on treatment received.

Q. Are there any Dos and Don'ts?

- A. Your healthcare practitioner may advise avoiding things like extended periods in the sun, saunas, UV rays or very cold temperatures, for a while.

Q. Should I book a follow-up treatment?

- A. Your healthcare practitioner will advise on how to maintain your results. They may suggest a follow-up appointment after treatment.

62%

of patients* returned to their normal routine on the same day as their treatment with Juvéderm® VOLBELLA®, part of the JUVÉDERM® range of products.

* 38 out of a study of 61 patients asked.

WHY JUVÉDERM[®] IT?

The world's leading brand of hyaluronic acid facial fillers.*

Allergan supports clinical practice by offering training to healthcare practitioners.

Results that can look and feel natural.

Results that can last for up to 24 months, depending on the treatment chosen.

SAFETY INFORMATION

JUVÉDERM® indications

JUVÉDERM® is a family of injectable implant products intended to smooth lines and wrinkles, enhance lips, treat perioral lines and oral commissures and restore lost volume to the cheeks and jawline.

JUVÉDERM® safety information

Your physician will ask about your medical history to determine if JUVÉDERM® products are appropriate for you. Tell your practitioner if you have:

- Severe allergies with a history of anaphylaxis, multiple severe allergies, allergies to hyaluronic acid or other filler products, or allergies to lidocaine or other local anesthetics.
- A history of autoimmune disease, recurrent sore throats, rheumatic fever, epilepsy, or porphyria.

The following are important treatment considerations for you to discuss with your practitioner before treatment in order to help avoid unsatisfactory results and complications:

- You are currently taking medications which prolong bleeding, such as acetylsalicylic acid (aspirin), non-steroidal anti-inflammatory drugs, or anticoagulants, as with any injection, you may experience prolonged bleeding. You should inform your practitioner about any medications you are currently taking.
- You have recently had other skin surface treatments (such as laser treatment, skin peels or dermabrasion) or have previously used fillers.
- You have skin infections or inflammation such as acne or cold sores.
- You scar frequently.
- You are pregnant or breastfeeding, or you are under the age of 18 years (under the age of 21 years if treating the lips), as the safety of JUVÉDERM® products has not been established.

Potential side effects associated with JUVÉDERM® products include temporary injection-site reactions such as redness, swelling, itching, pain, firmness, bumps, bruising and discolouration. These reactions may occur immediately or may be delayed and may last for up to a week. Injections in the lips may cause more swelling and bruising due to the unique physiology of this area. As with any injection, there is a risk of infection. This is not a complete list of side effects. If inflammatory reactions persist for more than one week, or if any other side effects develop, seek medical attention as soon as possible.

TEOSYAL HYALURONIC ACID

Hyaluronic Acid is a natural component of the skin that provides hydration to maintain elasticity and firmness. Over time, your skin's ability to produce hyaluronic acid decreases, which contributes to the development of fine lines and wrinkles, and changes to the shape and contours of your lips and face. When injected into the dermis, hyaluronic acid helps to hydrate, smooth wrinkles and provide a natural plumping effect on lips and skin.

YOUR BEAUTY HAS A FUTURE

In today's world, beauty is no longer a question of age. Women want their beauty to last into the future. That's why TEOXANE laboratories specializes in the complex development of hyaluronic acid injectable gels with researchers driven by the culture of excellence and innovation as well as a total dedication to effectiveness and safety. Thanks to this approach, the hyaluronic acid gels we produce in our Geneva based laboratories are of the highest quality and purity.

WHAT'S YOUR LIP ID?
REFLECT YOUR INNER SMILE

Find out about the **TEOXANE LipUnique Collection**

STRETCHES WITH EVERY SMILE

The 1st Hyaluronic Acid Filler designed to respect your natural expressiveness.

GIVE YOUR LIPS THE IDENTITY THEY DESERVE !

We all dream of having perfect lips that reflect our personality. Beautiful, well-shaped, soft, luscious, plumped, sophisticated, refreshed, kissable... all lips are unique! Beautiful lips can give us that little added boost of confidence.

Common lip concerns may include:

- Thin, small lips
- Asymmetry
- Flattened "cupid's bow"
- Dehydration
- Barcode lines

REFRESHED, REDESIGNED LIPS CAN GIVE YOU THAT EXTRA BOOST OF CONFIDENCE AND PUT THE RADIANCE BACK IN YOUR SMILE.

Customizable Treatments with Teosyal

Every smile is unique, which is why TEOXANE has the solution to address your individual lip concerns with a range of dermal fillers suitable for different needs.

- TEOSYAL RHA 1
- TEOSYAL RHA 2
- TEOSYAL RHA 3
- TEOSYAL KISS

Your practitioner will assess your smile and choose the perfectly matched product to achieve your desired outcome.

A close-up photograph of a woman's face, focusing on her eyes and the area under them. She has blonde hair and blue eyes. A thick, black, rectangular patch is applied under her right eye. The background is a plain, light blue-grey color.

WANT TO
WIN THE
BATTLE
AGAINST
UNDER EYE
CIRCLES?

TEOXANE

THE EXCELLENCE OF SWISS SCIENCE

**FROM THE AGE OF 30, 50% OF WOMEN
COMPLAIN ABOUT UNDER EYE CIRCLES¹**

Stress, lifestyle, thin skin, hereditary
factors...we are all unique when it
comes to under eye circles

1. Arcane Research study conducted in France in February 2011 on 4,402 women aged 18 to 75.

A close-up photograph of a person's face, focusing on the area around the eyes. The skin is fair, and there are visible dark circles under the eyes. The background is a soft, out-of-focus grey.

Your eyes are a reflection of your personality

Your eyes express your emotions and feelings.

But when your eyes are shadowed by under eye circles, they lose their sparkle and shine.

These hollow depressions are caused by a loss of volume below the eyes in the area between the lower eyelid and the cheek, often accompanied by a darkening of skin colour.

Under eye circles can give the illusion of tired, dull and aged appearance. As a result, you don't feel like yourself anymore, and every day you try to conceal them.

Your medical practitioner can provide a long-lasting solution to treat under eye circles, using injection of a hyaluronic acid gel specifically developed by TEOXANE Laboratories for the delicate eye contour.

Hyaluronic acid: a medical solution to treat under eye circles

Hyaluronic acid is a natural component² of the skin. It holds in moisture like a sponge, to keep skin firm, soft and supple.

However, with age, the skin's hyaluronic acid content diminishes. The skin loses volume, becomes dry, thin and fragile. Underneath the skin, other tissues also retract.

As a result, under eye circles become hollow and more visible.

TEOXANE: Experts in hyaluronic acid

For over 10 years, TEOXANE Laboratories have specialised in designing hyaluronic acid-based injectable products. Our researchers have developed a biocompatible gel specifically designed for the delicate under eye area: TEOSYAL REDENSITY[®] 2.

2. Papakonstantinou *et al.* Hyaluronic acid: A key molecule in skin aging. *Dermatoendocrinol.* 2012; 4(3): 253-8.

TEOSYAL REDENSITY[®] 2 is a trademark of TEOXANE SA and it is a product of the range TEOSYAL[®] PURESENSE.

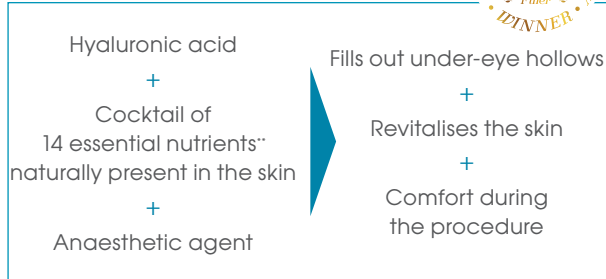

TEOSYAL[®] PureSense Redensity 2 is a medical device (class III) and is a regulated health product bearing the CE marking (CE0086) under this regulation. For more information, please consult your doctor or TEOSYAL[®] PureSense Redensity 2 instructions for use.

REDENSITY 2

An injectable gel specifically designed to treat under eye circles

A 3-in-1 patented formula*

Immediate and long-lasting aesthetic results:

- 1• Under eye circle evenly corrected³⁻⁵
- 2• Hydrated and younger-looking skin³⁻⁵
- 3• Long-lasting global satisfaction, proven over 12 months⁶

* FR1157848

**8 amino acids (including 5 essential ones), 3 antioxidants, 2 minerals and 1 vitamin (B6). Essential amino acids cannot be made by the body. As a result, they must be supplied by the food or other supplements.

3. Multicentric and international study: 2012/2013. 33 practitioners, 151 patients. Indications: 93% of patients were injected in the tear trough area.

4. Berguiga M, Galatoire O. Tear trough rejuvenation: a safety evaluation of the treatment by a semi-crosslinked Hyaluronic Acid filler. *Orbit*, 2017;36 (1):22-26.

5. Park *et al.* Hyaluronic acid filler combined with antioxidants for infraorbital rejuvenation: Report of two cases. *Dermatologic Therapy*. (in press)

6. Multicentric clinical study of 60 patients followed during 1 year (2010). Several months after the injection, the hyaluronic acid is naturally eliminated by the body.

Frequently asked questions about under eye treatment using Redensity 2

What will happen during the treatment?

The medical practitioner will make a precise diagnosis of the area requiring treatment. An injection of the Redensity 2 gel will be administered with a sterile, single-use syringe. The session will not take long, usually around 20 minutes.

How many treatments will I need?

Immediate results can usually be seen after just one visit. Occasionally, a touch-up injection may be needed within one month after your first session.

Can I go straight back to work after a session?

You may experience some post injection reactions such as minor bruising and/or swelling in the treated area. These reactions do not always occur and are usually mild, short term and correctable.

Ask your practitioner for advice and about possible side effects.*

TREATMENT INNOVATION

Dedicated to patient comfort during hyaluronic acid injection, TEOXANE Laboratories offer practitioners a new-generation injection system: the TEOSYAL®PEN.

An "injector pen" designed to:

- Reduce pain during treatment
- Reduce the intensity of local reactions (bruising, bleeding and swelling)

*There are potential side effects related to the implantation of this device, occurring immediately following injection or after delay. These include, among others : redness, oedema, papule. Patients should inform their practitioner of any secondary effects other than those described above or any effect persisting beyond one week.

3. Multicentric and international study: 2012/2013. 33 practitioners, 151 patients. Indications: 93% of patients were injected in the tear trough area.

4. Berguiga M, Galatoire O. Tear trough rejuvenation: a safety evaluation of the treatment by a semi-crosslinked Hyaluronic Acid filler. Orbit, 2017;36 (1):22-26.

TEOSYAL®PEN is a motorised and cordless device for hyaluronic acid injections to correct wrinkles and depressions. Manufactured by Juvaplus SA. This medical device (class IIa) is a regulated health product which bears, under this regulation, the CE mark (CE0434).

YOUR
EXPRESSIVENESS
IS YOUR
ATTRACTIVENESS,
WHY NOT KEEP IT
NATURAL ?

TEOXANE

THE EXCELLENCE OF SWISS SCIENCE

Beyond static features, your dynamic facial movements also contribute to your attractiveness.

Everyday smiles and other expressions reflect your emotions and help reveal your character^{1,2}. It is these subtle variations that create your individual charm and make you unique.

That's why TEOXANE Laboratories have considered beauty in its dynamic dimension and have strived to preserve what makes it authentic: movement.

*Let the beauty
of your skin reflect
your inner youth.*

1. Recio G, *et al.* Recognizing dynamic facial expressions of emotion: Specificity and intensity effects in event-related brain potentials. *Biol Psychol.* 2014;96:111-25. **2.** Donato G, *et al.* Classifying Facial Actions. *IEEE Trans Pattern Anal Mach Intell.* 1999;21(10):974.

MOVEMENTS BRING BEAUTY...

Your face is constantly in motion thanks to the precious skin elasticity^{2,3}:

- Laughter
- Exclamations
- Facial expressions
- Frowns/raised eyebrows

These natural movements make your beauty and share your emotions with others⁴.

Your skin plays a key role in this process. It stretches or folds according to the contractions of your facial muscles, no matter how tiny, to faithfully communicate your feelings to others^{5,6}.

... BUT SLOW DOWN OVER THE YEARS.

Over time, skin becomes drier, thinner and more fragile as its elasticity decreases^{3,7}. During each contraction of the facial muscles, skin will stretch, but then retract in an incomplete way³.

The more mobile facial areas are the first to be affected by this natural aging. Skin will eventually begin to sag, and “expressive” wrinkles will start to appear. These will become harder to smooth out. Features will begin to harden as the face loses tone and attractiveness⁸. With the onset of age, a dull and tired-looking skin appears. The face seems to be sad or inexpressive⁶.

2. Donato G, *et al.* Classifying Facial Actions. *IEEE Trans Pattern Anal Mach Intell.* 1999;21(10):974. **3.** Pawlaczyk M, *et al.* Age-dependent biomechanical properties of the skin. *Postepy Dermatol Alergol.* 2013;30(5):302-6. **4.** Fasel B, *et al.* Automatic facial expression analysis: a survey. *Pattern Recognition.* 2003;36:259-75. **5.** Krumhuber EG, *et al.* Effects of dynamic aspects of facial expressions: a review. *Emotion Review.* 2013;5:41-6. **6.** Michaud T, *et al.* Facial dynamics and emotional expressions in facial aging treatments. *J Cosmet Dermatol.* 2015;14(1):9-21. **7.** Baysperas M, *et al.* Clinical and biometrological efficacy of a hyaluronic acid-based mesotherapy product: a randomised controlled study. *Arch Dermatol Res.* 2013;305(8):673-82. **8.** Coleman SR, *et al.* The anatomy of the aging face: volume loss and changes in 3-dimensional topography. *Aesthet Surg J.* 2006;26(15):S4-9.

TEOSYAL®RHA

THE FIRST HYALURONIC ACID WHICH RESPECTS YOUR FACIAL EXPRESSIVENESS...

Created by TEOXANE Laboratories, TEOSYAL®RHA is a wrinkle filler product based on hyaluronic acid designed to support the skin in every move, while helping to preserve the vitality and softness of your face.

TEOSYAL®RHA is suitable for the most mobile areas of your face: perioral area, lips, cheeks, nasolabial folds, forehead, crow's feet⁹⁻¹²...

What is hyaluronic acid?

Hyaluronic acid is a natural component of the skin. It retains water like a sponge, to help keep the skin soft and firm^{13,14}. When used in aesthetic medicine, hyaluronic acid comes in the form of a gel¹⁴.

Resists to compression¹⁵,
e.g. in the cheeks

This class III medical device is a regulated health product bearing the CE marking (CE 0086), under this regulation.

... AND YOUR NATURAL LOOKS

Once administered by your doctor, the gel smoothes the wrinkles from within, supports cutaneous tissues according to their needs and gives back lost elasticity¹⁶. In turn, your features regain their tone and your face its liveliness.

INNOVATIVE, PATENTED TECHNOLOGY

The TEOSYAL[®]RHA products were created by TOXANE Laboratories according to a patented process, making it possible to meet the specific requirements of mobile facial areas. This technology preserves the natural characteristics of the hyaluronic acid molecules to obtain gels with high purity, close to the natural content of hyaluronic acid in the skin.

Stretches with the movements¹⁵,
e.g. in the lips
